

Main Changed Features

1. 2nd Generation New Pickup Set [Applied Models – V7, V7 Vin, V9, P7, M7, V3]

Pickup Set Change - The pickup set will be completely redesigned. The 2nd gen Marcus Miller Pickups will be made with different magnets and different coils for higher resolution and clearer sound. We have been collaborating with Marcus Miller to tailor the best sound balance and it will be introduced for in the 2nd Gen series. The exterior of the pickup will also change as it will be printed with a logo.

2. Ebony Fingerboard [Applied Models – V7, P7, M7]

Rosewood

Ebony

Rosewood fingerboards will be changed to Ebony fingerboards. In other words, the Alder + Rose combination will adapt the Alder + Ebony combination.

By employing the ebony fingerboard which falls into the higher priced product group, we have upgraded the quality of the instrument to the next level.

3. Rolled Edges [All Model]

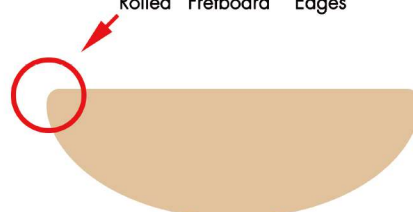

Rolled fretboard edge - Sire has taken the overall playability to the next level with its ROLLED FRETBOARD EDGES. These round edges will give you a better feel compared to the normal fingerboard.

Normal Fretboard Edges

Rolled Fretboard Edges

4. Neck Shape

Neck - From high gloss to satin neck. We've heard our customer's comments and have redefined the neck and changed it to a Satin finish for an added comfortability.

5. Miscellaneous Components [Battery Compartment, Serial No. ETC, 5ST Cover in V7]

Battery Compartment - The battery insertion compartment will be changed from a plastic cover to wooden cover to significantly reduce the defective rate.

Pickup Guard - The pickup guard, which were originally applied only to 4 string models, will also be included in the 5 string models.

Serial Number - The serial number on our 2nd Generation basses will start with 2N so you can easily identify the 2nd Generation models from the 1st Generation models.
